

Medicare Rx Update: January 31, 2006

In an effort to support pharmacists and to convey new information about best practices in the New Medicare Prescription Drug Benefit, CMS hosted a series of conference calls to provide specific information and tips about using the E1 and Point of Sale facilitated enrollment solutions. CMS was joined by Per-Se Technologies, Wellpoint and the American Society for Automation in Pharmacy (ASAP). This combination of participants provided pharmacists with an opportunity to share experiences and seek answers directly from the experts.

Please note, **the encore instructions for today's call have changed**. A recording of the second call will be available, beginning one hour after the call is completed, through Friday. A recording of the call may be accessed at (800) 759-1637.
